

WaterWise “Brown Bag” Workshops

Rainwater Harvesting

Bring your lunch, and learn about rainwater harvesting, tips for installing and maintaining a rain barrel, and techniques for troubleshooting common problems. The new WaterWise “Brown Bag” workshops offer abbreviated educational programs designed to fit into your lunch hour. This free workshop will offer an introduction to rainwater harvesting while displaying the Ivy Rain Barrel offered in partnership with Rainwater Solutions, Inc.

Topics covered will include:

- Benefits of rainwater harvesting
- Common installation and maintenance questions
- Troubleshooting techniques

About the Speaker

Kristy Woodard is a Water Education Coordinator with the City of Frisco. She earned her Master’s degree in Environmental Science with the University of North Texas in 2013. While there, she taught undergraduate laboratory courses in Environmental Science and conducted research focusing on the use of plants to filter pharmaceuticals from our drinking water supply.
